Please note: the contents/materials with the worst properties/characteristics within each packaging/handling unit and questionnaire determine the recycling process and corresponding pricing conditions.

Hence, the information provided below should only refer to materials of the same composition and quality. For materials with different properties (i.e., different selection in cipher 2), please fill out a separate questionnaire.

Accordingly, please use distinct packaging/containers for each questionnaire's material!

| 2     | Material Characteristics                                                            |                              |                                        |
|-------|-------------------------------------------------------------------------------------|------------------------------|----------------------------------------|
| 2.1   | Basic Data                                                                          |                              |                                        |
| 2.1.1 | Net weight incl. adherences [g]                                                     | 100.00 g                     |                                        |

| <p>We are under no obligation to process the delivered refining material until we are in receipt of a complete, correct and duly signed Questionnaire. Therefore, any periods agreed for the processing of refining material will be counted, at the earliest, from the time of receipt of a correctly completed and signed Questionnaire.</p> <p>Please also send us an EU material safety data sheet, if necessary. For amber list wastes according to Regulation (EC) No. 1013/2006 or refining material to be classified as a hazardous substance, we additionally require an EU-MSDS.</p>                                                                                                                                                                              |                                       |                                                |
